Statement of Evidence:

North Quarter corner of Section 24, Township 106 North, Range 42 West, 5th Principal Meridian, Murray County, Minnesota.

- 1866 J.W. Bishop, U.S. Deputy Surveyor, during the original public land survey a post was set in a mound.
- 1901 J.W. Woolstencroft, survey shows a distance from the center quarter of Section 13, but no description of the monument is given.
- 2021 Westwood Professional Services searched the area and did not recover a monument. Lines of occupation consist of an East/West gravel road and a field line to the North. After analysis of field measurements, it was determined that the best position for the corner is proportionally between the NE and NW corners of Section 24 and held the centerline of the gravel road for the North/South position. A No. 4 rebar was set with a cap marked "RLS 57085" and established 3 reference ties.

Analysis of the recovered data, field evidence and survey measurements, indicates that the monument set is the correct perpetuation of this corner. For additional information concerning this corner please contact Westwood Professional Services.
